

POLLINATOR PROTECTION PROGRAM

EMAIL NOTIFICATION WEB APP

Home Page URL: <https://www.kyagr-apps.com/Pollinator/>

REGISTRATION

Any user (Beekeeper or Pesticide Applicator) must REGISTER first. The REGISTER link should be on the top right corner of the Homepage (see the screenshot below).

Clicking the REGISTER link will take you to the Register page (see the screenshot below).

After the info is filled including a valid email id and the Register button clicked, the user will get an Activation email to their email account. The user will then need to activate their account from their email.

LOGIN

The activation link from the user's emails should automatically direct to the LOGIN page.

The users can go to their login page anytime by clicking the LOGIN link that is on the top-right corner of the Homepage menu (see the screenshot below).

Pollinator Protection Program

The KDA Pollinator Protection Program is designed to be a voluntary tool between chemical applicators and beekeepers in an effort to reduce hive mortality. If a chemical product label specifies that the applicator must communicate with area beekeepers prior to spraying, this program allows for beekeepers and others who are voluntarily registered to receive an email. Monarch waystation managers, specialty crop farmers, organic producers are also welcome to use this site, but you need to register as "beekeepers."

MAPPING

This is the most important step in all the process. Just by entering, the address in the profile will not be sufficient for any kind of email notifications. The user MUST click the MAP link at the top of the menu to enter their locations on the map (see the screenshot below).

Clicking the MAP link should take you to the Map page (see the screenshot below).

Please refer to the below link for a detail instructions and a video on how to add the locations, whether it be Beekeeper's Beehives/Apiaries or Pesticide Applicator's Applications, on the map.

<https://www.kyagr-apps.com/Pollinator/Home/Faq>

LOGOFF

After the user finishes entering the locations on the MAP, the user must logoff from the application by clicking the LOGOFF button (see the screenshot below).
